Everyday Moments.

ting

Infusing tropical bliss to your serene everyday moments.

Tropical Earthy Materials × Scandinavian Design Interiors
that Delight the Senses with Love

A perfect blend of relaxation and luxury,
elegantly enveloping your everyday life.

Thank you for your interest in "ting".

We specialize in both our own creations and carefully selected products made from natural materials that are kind to both people and the planet. Our journey began with a simple yet powerful vision: to foster a peaceful and gentle world by encouraging people to live harmoniously with nature. Currently, we operate from Okinawa (Japan), Hawaii (USA), Copenhagen (Denmark), and Ho Chi Minh (Vietnam), working with a small but dedicated global team to deliver products in the most sustainable ways possible. The name "ting" is inspired by the Okinawan word "天 (tin)," meaning "sky." This symbolizes the vast, gentle sky that connects all of us, reminding us that the world is one and that we are all part of a larger whole. If you have any questions or need assistance, please feel free to reach out via our website contact form or by email.

WHY TING?

Luxurious and relaxing Tropical Materials × Scandinavian Designs

ting combines the soothing essence of “tropical natural materials” inspired by places like Hawaii with the sophistication of “Scandinavian design” to create luxurious yet relaxing spaces. Our lead designer, a Danish expert with years of experience researching bamboo, brings a professional touch to every creation. With over 10 years of success in Europe and Australia, her designs have been cherished in luxury hotels and beyond. Now, for the first time, ting is bringing this exclusive collection to US and Japan market, available only through us.

Practicality That Matches Modern Lifestyles

While furniture made from Asian materials can be attractive on its own, it can sometimes feel too bold in terms of personality. However, ting offers furniture that is both functional and well-suited to modern living environments. With its natural curves, ting’s pieces are perfect for creating a gentle atmosphere while ensuring safety, especially for children. They are also highly recommended for business use, including in hotels and restaurants.

Simple and Sustainable Furniture

With a simple design that minimizes processing, our furniture not only reduces environmental impact during production but also follows an eco-friendly, circular business model that ensures materials are sourced responsibly, without depleting the planet's resources. Additionally, our furniture is lightweight, and by making bamboo pieces foldable, we reduce CO2 emissions during transportation.

TING IS *Absolutely* UNIQUE

Each Piece is Unique Due to the Use of Natural Materials

At our company, we create products primarily using organic bamboo. Because of it, there may be slight variations in color, texture, shape (such as warping, wood grain, or minor imperfections), and, in the case of fabric, variations in patterns, prints, or finishes. These unique characteristics make each item one of a kind, and as such, they are not eligible for return or exchange. We hope you enjoy the individuality of each piece.

Changes Due to Aging, Direct Sunlight, and Rain

Our products can be used both indoors and outdoors, wherever you prefer. However, please avoid exposing them to extreme changes in humidity or temperature, prolonged rain, or direct sunlight, as these conditions may cause mold or cracking. These changes are not eligible for return or exchange.

Small Marks May Appear During the Finishing Process

Our furniture is handcrafted by skilled artisans. During the finishing process, traditional bamboo mallets are used, which may result in small marks or scratches. These are not defects but rather part of the handmade process, and as such, they are not eligible for return or exchange. We hope you will appreciate these unique marks to the craftsmanship behind each piece.

*The warranty period for ting products is one year. If, during this period, you experience any damage or injury (such as personal harm) despite following the proper usage instructions, or if the product itself breaks, please contact us promptly via the inquiry form on our website. In such cases, we kindly ask that you provide proof of purchase from us, such as the official invoice from our company. Please note that we are unable to provide warranty coverage for any issues after the warranty period has expired. Additionally, due to the natural materials used, aging issues such as mold or cracking are not covered by the warranty. We appreciate your understanding.

EASY CARE

By following these two simple points, you can enjoy your ting products for years to come.

1 Perfect for Outdoor Use with avoid excessive wetting

Treat bamboo furniture similarly to other wooden furniture. A slight amount of moisture is okay, but changes in humidity and temperature can cause mold or cracking, so please avoid prolonged exposure to rain or direct sunlight, as this may cause damage. After the furniture gets wet, especially, make sure to dry it thoroughly by exposing it to sunlight or cool air from a hair dryer to evaporate any moisture absorbed into the bamboo. If the legs of the furniture are in contact with wet ground, water may seep inside and cause damage, so always place the furniture on a dry, well-ventilated surface. Additionally, cushions or fabric parts are vulnerable to rain, and mold can spread from the fabric. Please ensure they stay dry and avoid exposure to rain.

For Dirt and Mold: Simply wipe them off quickly. 2

When using your furniture for the first time, or during regular maintenance, wipe it down with a dry, soft cloth. If you'd like to give it a thorough polish, do so in a well-ventilated outdoor area while wearing thick gloves. Use a specialized cleaning solution (by mixing 2 drops of dishwashing detergent and 2 teaspoons of ammonia into 3L of water.) and a well-wrung sponge to gently wipe the surface. Afterward, rinse with clean water to ensure no cleaning solution remains. To finish, dry the furniture thoroughly by exposing it to air or using the cool air from a hairdryer.

This specialized solution is also effective if white mold appears from rain exposure.

For extra shine, flaxseed oil is highly recommended. Apply the oil to a dry, soft cloth and gently rub it into the furniture, being careful not to over-apply or rub too hard.

Brand New

After 2 Years of
Outdoor Exposure

Before wiping
After wiping

Country of Origin: Vietnam

Dimensions: Listed in centimeters for each product in the brochure

Structural Materials: Bamboo

Surface Finish: Lacquer coating

Upholstery Fabric: 65% Cotton, 35% Polyester

Cushion Material: Polyester cotton or polyurethane foam

Care Instructions: Avoid roughness on the surface, and protect from extreme changes in humidity, prolonged exposure to rain, and direct sunlight.
